Profil

Enthusiastic Computer and Network Engineering student with strong technical and community-building skills. Passionate about decentralized technologies, machine learning, and reinforcement learning. Experienced in guiding peers, moderating discussions, and simplifying complex technical concepts for broader audiences. Adept at bridging the gap between engineering teams and community members by creating accessible documentation, tutorials, and support resources. Driven to foster open, global collaboration and contribute to thriving ecosystems like Affine's incentivized RL environment on Bittensor Subnet-120.
